Post Snow Storm Pix

In general, the plowing seems to be as good as can be done given the number of cars in the lot.

The parking lot end of the pathway leading to Buildings B & D is very icy from the lot to the B Building entrance. (I confirmed with someone in the parking lo, (I think it was Sally Plauche) that the salt buckets are in place in lobbies of buildings.

Parking Lot is pretty good. You can see where cars are still or were parked when the lot was last plowed. Starting with front of D Building.

B1/B4 Entrance

Emergency egress from upper Building A
